PERFORMANCE

NET of Fees

If you had invested \$100,000 in January 2020, your initial investment would have increased to \$143,088.

Future Perspectives

The Real Estate Fund's long-term return target is around 8%. We have exceeded this target for the years 2021 and 2022 and achieved a below-target return for 2023.

Year 2024

Anticipated inflation for 2024 will contribute to an increase in rental rates. The combination of inflation, the demand of vacationers and the maturity of our real estate portfolio will favor better net income this year. We anticipate a slightly higher performance than our long-term objective.

Financial leverage

The Fund allows a maximum leverage of 50% of its total value, and we expect to maintain a leverage level between 20% and 25% by the end of 2024. Our current loans are predominantly fixed-rate with an average remaining term of over 3 years, thus reducing the negative impact of rising interest rates.
